

# RAKUWORLD

PC / WINDOWS | CO-OP HORDE SURVIVAL | STEAM

Draw your own hero, then fight hordes with up to three friends.

Your drawing becomes a playable hero.

Four heroes take on the horde together.

## THE HOOK

Create a hero in the in-game drawing editor, choose a class kit and bring your own doodle into a retro 3D notebook world.

## PLAY, BUILD, REPEAT

Solo or local co-op for up to four players. 36 heroes, 11 worlds, 22 bosses, weapon evolutions and persistent progression. Global Steam leaderboards are organized by map and party size.

## CURRENT STAGE

A playable Windows build is ready for evaluation; Steam release preparation is underway. Native Steam online co-op is integrated, with cross-PC validation still pending.

## PARTNERSHIP

Seeking a publishing partner for marketing, creator outreach, QA and localization. Launch timing, commercial scope and any funding requirements are open for discussion.

## TRY IT

A 30-second gameplay preview accompanies this overview. A standalone review build is packaged locally and available to share through a preferred review channel. Offline play does not require Steam; online and leaderboard features require Steam.
